Further, in certain circumstances, the Issuer may amend the terms and conditions of the Securities, without the Holders' consent. • The terms and conditions of the Securities permit the Issuer and the Calculation Agent (as the case may be), on the occurrence of certain events and in certain circumstances, without the Holders' consent, to make adjustments to the terms and conditions of the Securities, to redeem the Securities prior to maturity, (where applicable) to postpone valuation of the underlying asset or scheduled payments under the Securities, to change the currency in which the Securities are denominated, to substitute the Issuer with another permitted entity subject to certain conditions, and to take certain other actions with regard to the Securities and the underlying asset (if any).

Non-scheduled Early Repayment Amount

Unscheduled early redemption: The Securities may be redeemed prior to the scheduled maturity (i) at the Issuer's option (a) if the Issuer determines a change of applicable law has the effect that its performance under the Securities has become unlawful or impracticable (in whole or in part), (b) where applicable, if the Calculation Agent determines that certain additional disruption events or adjustment events as provided in the terms and conditions of the Securities have occurred in relation to the Underlying Asset or (ii) upon notice by a Holder declaring such Securities to be immediately repayable due to the occurrence of an event of default which is continuing.

The Non-scheduled Early Repayment Amount may be less than your initial investment and therefore you may lose some or all of your investment on an unscheduled early redemption.

Settlement Amount

Unless the Certificates have been redeemed or purchased and cancelled prior to the maturity date and subject to any adjustments made under the terms and conditions of the Securities, each Certificate will be redeemed on the maturity date by payment of the Settlement Amount in accordance with paragraph (i) or (ii) below (as applicable):

- (i) if the SX5E Final Performance is *greater than or equal to* the Barrier Level, the Settlement Amount payable in respect of each Certificate shall be an amount in the Settlement Currency calculated in accordance with the formula below:

$$N \times \{1 + [P \times \text{Max}(0; OP)]\}; \text{ or}$$

- (ii) if the SX5E Final Performance is *less than* the Barrier Level, the Settlement Amount payable in respect of each Certificate shall be an amount in the Settlement Currency calculated in accordance with the formula below:

SECTION D: RISKS		
D.2	Key risks that are specific to the Issuer, the Guarantor and the Group:	<p>The Issuer and the Guarantor could fail or otherwise be unable to make the payments owing under the Securities. If that happens, you will not have the protection of any deposit insurance scheme and your Securities will not be secured, and you may lose some or all of your money.</p> <p>References in Elements B.12 and B.19 (B.12) above to the "prospects" and "financial or trading position" of the Issuer and Guarantor (as applicable), are specifically to their respective ability to meet their full payment obligations under the Securities (in the case of GSI) or Guarantee (in the case of GSG) in a timely manner. Material information about GSI's and GSG's respective financial condition and prospects is included in the GSG periodic reports on Forms 10-K, 10-Q and 8-K which are incorporated by reference into the Registration Document and the Annual Report on Form 10-K for The Goldman Sachs Group, Inc. for the fiscal year ended December 31, 2013 which is incorporated by reference into this Prospectus. You should be aware, however, that each of the key risks highlighted below could have a material adverse effect on the Issuer's and Guarantor's businesses, operations, financial and trading position and prospects, which, in turn, could have a material adverse</p>

		<p>effect on the return investors receive on the Securities.</p> <p>As part of a leading global financial services group the Issuer and the Guarantor are subject to a number of key risks of the Group:</p> <ul style="list-style-type: none"> • The Group's businesses have been and may continue to be adversely affected by conditions in the global financial markets and economic conditions generally. • The Group's businesses have been and may be adversely affected by declining asset values. This is particularly true for those businesses in which it has net "long" positions, receives fees based on the value of assets managed, or receives or posts collateral. • The Group's businesses have been and may be adversely affected by disruptions in the credit markets, including reduced access to credit and higher costs of obtaining credit. • The Group's market-making activities have been and may be affected by changes in the levels of market volatility. • The Group's investment banking, client execution and investment management businesses have been adversely affected and may continue to be adversely affected by market uncertainty or lack of confidence among investors and CEOs due to general declines in economic activity and other unfavourable economic, geopolitical or market conditions. • The Group's investment management business may be affected by the poor investment performance of its investment products. • The Group may incur losses as a result of ineffective risk management processes and strategies. • The Group's liquidity, profitability and businesses may be adversely affected by an inability to access the debt capital markets or to sell assets or by a reduction in its credit ratings or by an increase in its credit spreads. • Conflicts of interest are increasing and a failure to appropriately identify and address conflicts of interest could adversely affect the Group's businesses. • The Guarantor is a holding company and is dependent for liquidity on payments from its subsidiaries, many of which are subject to restrictions. • The Group's businesses, profitability and liquidity may be adversely affected by deterioration in the credit quality of, or defaults by, third parties who owe the Group money, securities or other assets or whose securities or obligations it holds. • Concentration of risk increases the potential for significant losses in the Group's market-making, underwriting, investing and lending activities. • The financial services industry is both highly competitive and interrelated. • The Group faces enhanced risks as new business initiatives leads it to transact with a broader array of clients and counterparties and exposes it to new asset classes and new markets. • Derivative transactions and delayed settlements may expose the Group

		<p>to unexpected risk and potential losses.</p> <ul style="list-style-type: none"> • The Group's businesses may be adversely affected if it is unable to hire and retain qualified employees. • The Group's businesses and those of its clients are subject to extensive and pervasive regulation around the world. • The Group may be adversely affected by increased governmental and regulatory scrutiny or negative publicity. • A failure in the Group's operational systems or infrastructure, or those of third parties, could impair the Group's liquidity, disrupt its businesses, result in the disclosure of confidential information, damage its reputation and cause losses. • Substantial legal liability or significant regulatory action against the Group could have material adverse financial effects or cause significant reputational harm, which in turn could seriously harm the Group's business prospects. • The growth of electronic trading and the introduction of new trading technology may adversely affect the Group's business and may increase competition. • The Group's commodities activities, particularly its power generation interests and physical commodities activities, subject the Group to extensive regulation, potential catastrophic events and environmental, reputational and other risks that may expose it to significant liabilities and costs. • In conducting its businesses around the world, the Group is subject to political, economic, legal, operational and other risks that are inherent in operating in many countries. • The Group may incur losses as a result of unforeseen or catastrophic events, including the emergence of a pandemic, terrorist attacks, extreme weather events or other natural disasters.
D.6	<p>Key risks of the Securities and risk warning that investors may lose entire investment:</p>	<p>The capital invested in the securities is at risk. Therefore, investors may lose up to all of their investment.</p> <ul style="list-style-type: none"> • <i>Risk of loss of investment:</i> If the SX5E Final Performance is below 60 per cent., you will lose some or up to all of your investment. You should not invest in the Securities unless you can withstand up to a total loss of your invested amount. • <i>Setting of the Participation risk:</i> The Participation will not be set by the Issuer until the Initial Valuation Date (April 29, 2014). There is a risk that the final percentage set by the Issuer will be other than the indicative percentage provided in this document, though the final percentage will not be less than the minimum percentage provided. Nevertheless, investors must base their investment decision on the indicative percentage (and the minimum percentage) so provided, and will not have a right of withdrawal from their purchase obligation when the percentage is finally set and no supplement will be published in relation to such final setting. • <i>Market risk:</i> The value of the Securities depends on the value of the Underlying Asset. The past performance of an Underlying Asset is not indicative of its future performance. The market value of the Securities may be highly volatile and may be adversely affected by a number of

		<p>factors, such as (i) the credit rating of the Issuer or the Guarantor and (ii) the performance of the Underlying Asset.</p> <ul style="list-style-type: none"> • Reinvestment risk: If the Securities are redeemed prior to scheduled maturity following an unscheduled early redemption, a holder may not be able to reinvest the proceeds at an effective interest rate as high as the interest rate or yield on the Securities being redeemed and may only be able to do so at a significantly lower rate. You should consider such reinvestment risk in light of other investments available at that time. • Risks associated with listed Securities: Investors should note the Issuer will not be obliged to maintain the listing of the Securities in certain circumstances, such as changes in listing requirements. • Lack of secondary market risk: An active trading market for the Securities is not likely to develop: the Securities may have no liquidity or the market for the Securities may be limited and this may adversely impact their value or the ability of a holder of Securities to sell them. Also, because the Securities may not be redeemed early, you must be prepared to hold them until scheduled maturity. • Secondary market price risk: The purchase price offered to you for the Securities might be less than the price at which you purchased the Securities and will depend on various factors. Such factors include the value and movements of the Underlying Asset, interest rates, the dividend rate on the shares that comprise the Underlying Asset, time remaining to the Valuation Date and/or the last Averaging Date and the creditworthiness of the Issuer and the Guarantor. • Averaging risk: The amount payable (or deliverable) on the Securities (whether at maturity or otherwise) will be based on the average of the applicable values of the underlying asset(s). If the value of an underlying asset(s) dramatically surged on a number of averaging dates, the amount payable may be significantly less than it would have been had the amount payable been linked only to the value of that underlying asset(s) on one single date. • Index-linked risk: Purchasers of the Securities may receive a lower return on the Securities than any return such purchaser would have received from investing in the components of each index directly because the relevant index level may reflect the prices of such index components without including the value of dividends paid on those components. Each index sponsor may take any actions in respect of an index without regard to the interests of the purchasers of the Securities, and any of these actions could adversely affect the market value of the Securities. • Unscheduled early redemption or adjustment risk: The Issuer may redeem the Securities prior to their scheduled maturity date for taxation reasons or for reasons of illegality. The Issuer may also redeem the Securities early or adjust their terms following the occurrence of certain events in relation to the Underlying Asset. In the event of (i) unscheduled early redemption, the Securities may redeem earlier than you had anticipated, and (ii) unscheduled early redemption or adjustment, the amount you receive may be lower than the issue price and could be as low as zero. • Risk that the Securities may not be suitable or appropriate for you: The Securities are structured products which effectively include embedded derivatives, and before deciding to purchase Securities you must understand their terms including (i) the potential risk of the loss of
--	--	--

		<p>some or all of your investment and (ii) the relationship of the potential payout on the Securities to the value of the Underlying Asset. You should reach an investment decision only after careful consideration, with your own tax, accounting, legal and other professional advisers, of the suitability of the Securities in the light of your particular financial circumstances and investment objectives and risk profile, and the information set forth in this Prospectus.</p> <ul style="list-style-type: none"> • Conflicts of interest risk: GSG affiliates are subject to certain conflicts of interest between their own interests and those of the holders of the Securities, including: <ul style="list-style-type: none"> • the Issuer (itself or through an affiliate) may hedge the Issuer's obligations under the Securities by purchasing futures and/or other instruments linked to an Underlying Asset or the stocks or other components underlying an Underlying Asset, and this may adversely affect the performance of an Underlying Asset and value of the Securities; • the Calculation Agent under the Securities is an affiliate of the Issuer and potential conflicts of interest may exist between each such calculation agent and the purchasers, including with respect to the exercise of the discretionary powers to determine amounts, adjustments and redemptions; and • the Issuer, the Guarantor and certain affiliates may from time to time, by virtue of their status as underwriter, advisor or otherwise, possess or have access to information relating to the Securities, the Underlying Asset, and any derivative instruments referencing them and shall not be obliged to disclose any such information to a purchaser of the Securities.
SECTION E: OFFER		
E.2b	Reasons for the offer and the use of proceeds:	The net proceeds from the issue of the Securities will be used in the general business of the Issuer.
E.3	Description of terms and conditions of the offer:	<p>An offer of the Certificates will be made other than pursuant to Article 3(2) of the Prospectus Directive in the Kingdom of Sweden ("Public Offer Jurisdiction") during the period commencing on (and including) March 10, 2014 and ending on (and including) April 17, 2014 by the Authorised Offeror(s) (as at the date hereof, being Mangold Fondkommission AB, Engelbrektsplan 2, 114 34 Stockholm, Sweden).</p> <p>The Offer Price is 100 per cent. of the Nominal Amount per Security (the "Issue Price"). E.4	Description of any interest that is material to the issue/offer including conflicting interests:	Save as discussed in " <i>Conflicts of interest risk</i> " in Element D.6 above, so far as the Issuer is aware, no person involved in the issue of the Securities has an interest material to the offer, including conflicting interests.
E.7	Estimated expenses charged	The Issue Price of 100 per cent. (100%) of the Aggregate Nominal Amount includes a selling commission of up to 4.2 per cent. (4.2%) of the Aggregate

RISK FACTORS

1. Risks relating to loss of investment and suitability of Securities

1.1 Purchasers of Securities may receive back less than the original invested amount

PURCHASERS OF SECURITIES MAY LOSE THEIR ENTIRE INVESTMENT OR PART OF IT, AS THE CASE MAY BE, TOGETHER WITH ANY TRANSACTION COSTS INCURRED, AS A RESULT OF THE OCCURRENCE OF ANY ONE OF THE FOLLOWING EVENTS:

- (i) THE SECURITIES ARE CAPITAL-AT-RISK INVESTMENTS. IF THE REFERENCE LEVEL OF THE SX5E INDEX ON THE FINAL VALUATION DATE IS LESS THAN 60 PER CENT. OF ITS INITIAL LEVEL, YOU WILL LOSE SOME AND UP TO ALL OF YOUR INVESTMENT;**
- (ii) THE SECURITIES ARE SOLD BY THE PURCHASER PRIOR TO THE SCHEDULED MATURITY FOR AN AMOUNT LESS THAN THE PURCHASER'S INITIAL INVESTMENT;**
- (iii) THE BANKRUPTCY OR INSOLVENCY OF THE ISSUER AND/OR THE GUARANTOR OR OTHER EVENTS ADVERSELY AFFECTING THE ISSUER'S OR THE GUARANTOR'S ABILITY TO MEET ITS PAYMENT AND OTHER OBLIGATIONS UNDER THE SECURITIES; OR**
- (iv) THE SECURITIES ARE SUBJECT TO UNSCHEDULED EARLY REDEMPTION (E.G., FOR CHANGE OF APPLICABLE LAW OR DUE TO AN EVENT IN RELATION TO THE UNDERLYING ASSET AND THE EARLY REDEMPTION AMOUNT IS LESS THAN THE ORIGINAL INVESTED AMOUNT.**

1.2 Setting of Participation

The Participation will not be set by the Issuer until the Initial Valuation Date (April 29, 2014). There is a risk that the final percentage set by the Issuer will be other than the indicative percentage provided in this document, though the final percentage will not be less than the minimum percentage as provided. Nevertheless, investors must base their investment decision on the indicative percentage (and the minimum percentage) so provided, and will not have a right of withdrawal from their purchase obligation when the percentage is finally set and no supplement will be published in relation to such final setting.

1.3 Suitability of Securities for purchase

Before purchasing Securities, each purchaser must ensure that the nature, complexity and risks inherent in the Securities are suitable for his or her objectives in the light of his or her circumstances and financial position. No person should purchase the Securities unless that person understands the extent of that person's exposure to potential loss. Each prospective purchaser of Securities should consult his or her own legal, tax, accountancy, regulatory, investment or other professional advisers to assist him or her in determining whether the Securities are a suitable investment for them or to clarify any doubt about the contents of this Prospectus (including for the avoidance of doubt, each document incorporated by reference herein).

Neither the Issuer nor the Guarantor has given, and does not give, to any prospective purchaser of Securities (either directly or indirectly) any assurance or guarantee as to the merits, performance or suitability of such Securities to any potential purchaser, and the purchaser should be aware that the Issuer is acting as an arm's-length contractual counterparty and not as an advisor or fiduciary.

2. Risks associated with the Securities generally

2.1 Valuation of the Securities; inducements and/or commissions and/or fees

Assuming no changes in market conditions or Goldman Sachs' creditworthiness and other relevant factors, the value of the Securities on the date of this Prospectus (as determined by reference to pricing models used by Goldman Sachs and taking into account Goldman Sachs' credit spreads) may be significantly less than the original issue price. In addition, purchasers of the Securities should be aware that the issue price may include inducements and/or commissions and/or other related fees paid by the Issuer to distribution partners as payment for distribution services. This can cause a difference between the issue price of the Securities and any bid and offer prices quoted by the Issuer, any Goldman Sachs affiliate or any third party. Such differences may be greater when the Securities are initially traded on any secondary markets and may gradually decline in value during the term of the Securities. Information with respect to the amount of any such inducements, commissions and fees will be included in this Prospectus and/or may be obtained from the Issuer upon request.

2.2 Reinvestment risk

If the Securities are redeemed prior to scheduled maturity, a holder may not be able to reinvest the proceeds at an effective interest rate as high as the interest rate or yield on the Securities being redeemed and may only be able to do so at a significantly lower rate. Investors in Securities should consider such reinvestment risk in light of other investments available at that time.

2.3 Limited liquidity of Securities

Unless otherwise communicated by the Issuer or any Goldman Sachs affiliate to the purchaser of the Securities, or to the extent that the rules of any stock exchange on which the Securities are listed and admitted to trading require the Issuer or any Goldman Sachs affiliate to provide liquidity in respect of such Securities, the Securities may have no liquidity or the market for such Securities may be limited and this may adversely impact their value or the ability of the purchaser of Securities to dispose of them.

A secondary market is unlikely to develop and, even if a secondary market does develop, it is not possible to predict the price at which the Securities will trade in such secondary market. Neither the Issuer nor any Goldman Sachs affiliate is under an obligation or makes any commitment, to make a market in or to repurchase the Securities. If the Issuer or any Goldman Sachs affiliate does make a market for the Securities, it may cease to do so at any time without notice. Purchasers should therefore not assume that the Securities can be sold at a specific time or at a specific price during their life.

Neither the Issuer nor any Goldman Sachs affiliate has any obligation to provide any quotation of bid or offer price(s) of the Securities which is favourable to any purchaser of the Securities. Although the Issuer will apply for the Securities to be admitted to trading on a stock exchange, there is no assurance that such application will be accepted, that the Securities will be so admitted or that an active trading market will develop. Accordingly, there is no assurance as to the development or liquidity of any trading market for the Securities. Neither the Issuer nor any Goldman Sachs affiliate assumes any responsibility for, or makes any commitment to, any potential purchaser of the Securities for such development or liquidity of any trading market for such Securities. Investors should note the Issuer will not be obliged to maintain the listing of the Securities in certain circumstances, such as changes in listing requirements.

2.4 Price discrepancies in secondary market

The value or quoted price of the Securities at any time will reflect many factors and cannot be predicted, and if a purchaser sells his or her Security prior to its maturity, such purchaser may receive less than its issue price. Such factors, most of which are beyond the control of Goldman Sachs, will influence the

market price of the Securities, and will include national and international economic, financial, regulatory, political, terrorist, military and other events that affect securities generally, interest and yield rates in the market, the time remaining until the Securities mature, the creditworthiness of the Issuer and the Guarantor, and the performance of the Underlying Asset. If the Issuer or any Goldman Sachs affiliate does make a market in the Securities, the price quoted by such Goldman Sachs entity for the Securities will reflect any changes in market conditions and other relevant factors including a deterioration in Goldman Sachs' creditworthiness or perceived creditworthiness whether measured by Goldman Sachs' credit ratings or other measures. These changes may adversely affect the market price of the Securities, including the price a purchaser may receive for its Securities in any market making transaction. In addition, even if Goldman Sachs' creditworthiness does not decline, the value of the Securities on the trade date may be significantly less than the original price taking into account Goldman Sachs' credit spreads on that date. The quoted price could be higher or lower than the original issue price, and may be higher or lower than the value of the Securities as determined by reference to pricing models used by Goldman Sachs.

If at any time a third party dealer quotes a price to purchase the Securities or otherwise values the Securities, that price may be significantly different (higher or lower) than any price quoted by any Goldman Sachs affiliate. Furthermore, if any purchaser sells its Securities, the purchaser will likely be charged a commission for secondary market transactions, or the price will likely reflect a dealer discount.

2.5 **Change of applicable law, Early Redemption and Reinvestment Risk**

Upon the Issuer becoming aware of (i) the adoption of, or change in, any applicable law or (ii) the promulgation of, or any change in, the interpretation of any applicable law by a court, tribunal or regulatory authority with competent jurisdiction, which has the effect that its performance under the Securities has become unlawful or impracticable in whole or in part for any reason, the Issuer may (a) amend the terms of the Securities to cure such unlawfulness or impracticability or (b) redeem or terminate the Securities. In the case of early redemption or termination, if permitted by applicable law, the Issuer shall pay the purchaser of such Securities an amount equal to the non-scheduled early repayment amount of such Securities notwithstanding such illegality, as determined by the Calculation Agent in its sole and absolute discretion. A purchaser of Securities should be aware that this non-scheduled early repayment amount may be less than the purchaser's initial investment, and in such case see risk factor, "*1.1 Purchasers of Securities may receive back less than the original invested amount*". Following any such early redemption or termination of the Securities, the purchasers of such Securities may not be able to reinvest the redemption proceeds at any effective interest rate as high as the interest rate or yield on the Securities being redeemed and may only be able to do so at a significantly lower rate. Purchasers of the Securities should consider reinvestment risk in light of other investments available at that time.

2.6 **Change in Tax Law**

Tax law and practice is subject to change, possibly with retrospective effect and this could adversely affect the value of the Securities to the purchaser and/or the market value of the Securities. Any such change may (i) cause the tax treatment of the Securities to change from what the purchaser understood the position to be at the time of purchase; (ii) render the statements in the Base Prospectus concerning relevant tax law and practice inaccurate or inapplicable in some or all respects to the Securities or to not include material tax considerations in relation to the Securities; or (iii) give the Issuer the right to amend the terms of the Securities, or early redeem or terminate the Securities, if such change has the effect that the Issuer's performance under the Securities is unlawful or impracticable (see risk factor "*2.5 Change of applicable law, Early Redemption and Reinvestment Risk*"). **Prospective purchasers of any Securities should consult their own tax advisers in relevant jurisdictions about the tax implications of holding any Security and of any transaction involving any Security.**

2.7 Amendments to the Securities bind all purchasers of the Securities

The terms and conditions of the Securities may be amended by the Issuer, (i) in certain circumstances, without the consent of the purchasers of the Securities and (ii) in certain other circumstances, with the required consent of a defined majority of the purchasers of such Securities. The terms and conditions of the Securities contain provisions for purchasers to call and attend meetings to consider and vote upon matters affecting their interests generally. Resolutions passed at such meetings can bind all purchasers, including purchasers who did not attend and vote at the relevant meeting and purchasers who voted in a manner contrary to the majority.

2.8 Substitution of the Issuer

The Issuer may be substituted as principal obligor under the Securities by any company from the Goldman Sachs Group of companies. Whilst the new issuer will provide an indemnity in favour of the purchasers of such Securities in relation to any additional tax or duties that become payable solely as a result of such substitution, purchasers will not have the right to consent to such substitution.

3. Risks associated with Securities that reference one or more Underlying Asset(s)

3.1 Performance of the Securities is linked to the performance of the Underlying Asset

Where the Securities reference one or more Underlying Asset(s), the purchasers of such Securities are exposed to the performance of such Underlying Asset(s). The rate, price, performance or investment return of the Underlying Asset(s) may be subject to unpredictable change over time and this degree of change is known as "volatility". The volatility of an Underlying Asset may be affected by national and international financial, political, military or economic events, including governmental actions, or by the activities of participants in the relevant markets. Any of these events or activities could adversely affect the value of the Securities. Volatility does not imply direction of the rate, price, performance or investment returns, though an Underlying Asset that is more volatile is likely to increase or decrease in value more often and/or to a greater extent than one that is less volatile.

Where the performance of an Underlying Asset in relation to any particular Securities is calculated on a "European basis", i.e., a comparison is made between the Underlying Asset's price on a start date and a future date to determine performance, purchasers will not benefit from any increase in the Underlying Asset's price from the start date up to, but excluding, the specified date on which the Underlying Asset's price will be determined for the purpose of the Securities.

3.2 Past performance is not indicative of future performance

Any information about the past performance of the Underlying Asset at the time of the issuance of the Securities should not be regarded as indicative of the range of, or trends in, fluctuations in the Underlying Asset that may occur in the future.

3.3 No rights of ownership in the Underlying Asset(s)

The purchasers of Securities should be aware that the Underlying Asset(s) will not be held by the Issuer for the benefit of the purchasers of such Securities, and as such, purchasers will not obtain any rights of ownership, including, without limitation, any voting rights, any rights to receive dividends or other distributions or any other rights with respect to any Underlying Asset(s) referenced by such Securities.

3.4 Postponement or alternative provisions for determination of the Underlying Asset(s)

If the Calculation Agent determines that any form of disruption event in relation to the Underlying Asset(s) has occurred which affects the determination of the rate or other applicable value of such

Underlying Asset(s) on any relevant day, the Calculation Agent may apply any consequential postponement of, or any alternative provisions for, determination of the rate or other applicable value of such Underlying Asset(s) provided in the terms and conditions of the Securities, including a determination of the rate or other applicable value of such Underlying Asset(s) by the Calculation Agent in its discretion, acting in good faith and in a commercially reasonable manner, each of which may have an adverse effect on the value of the Securities. In the event that the valuation day of the Underlying Asset(s) is postponed, the maturity date on which cash settlement is made may be postponed.

3.5 Calculation Agent determination in respect of the Underlying Asset(s), adjustment to or early redemption or termination of the Securities and reinvestment risk following such early redemption or termination

If the Calculation Agent determines that any form of adjustment event in relation to the Underlying Asset(s) has occurred, the Calculation Agent may adjust the terms and conditions of the Securities (without the consent of the purchasers) or may procure the early redemption or termination of such Securities prior to their scheduled maturity date, in each case, in accordance with such terms and conditions. In the event of such early redemption or termination the Issuer will pay the non-scheduled early repayment amount in respect of such Securities, which may be determined on the basis of market quotations obtained from qualified financial institutions, or where insufficient market quotations are obtained, will be an amount determined by the Calculation Agent to be equal to the fair market value of such Securities immediately prior (and taking into account the circumstances leading to) such early redemption or termination (and the fact that such circumstances are taken into account will tend to reduce any amount payable on the Securities on early redemption or termination). A purchaser of such Securities should be aware that, where the non-scheduled early repayment amount is calculated in accordance with the foregoing, it is likely that such amount will be less than the purchaser's initial investment, and in such case see risk factor, "*1.1 Purchasers of Securities may receive back less than the original invested amount*". Following any such early redemption or termination of Securities, the purchasers of such Securities will generally not be able to reinvest the proceeds at any effective interest rate as high as the interest rate or yield on the Securities being redeemed or terminated and may only be able to do so at a significantly lower rate. Purchasers of Securities should consider reinvestment risk in light of other investments available at that time.

3.6 The effect of averaging

The amount payable on the Securities may be based on the arithmetic average of the applicable levels, prices, rates or other values of the Underlying Asset(s) on each of the specified averaging dates, and not the simple performance of the Underlying Asset(s) over the term of the Securities. For example, if the applicable level, price, rate or other value of the particular Underlying Asset(s) dramatically surged on two or more averaging dates, the amount payable on the Securities may be significantly less than it would have been had the amount payable been linked only to the applicable level, price, rate or other value of the Underlying Asset(s) on a single valuation date.

3.7 Securities with foreign exchange risks

Where the terms and conditions of the Securities provide that payment under such Securities will be made in a currency which is different from the currency of the Underlying Asset(s), and such Securities do not have a "quanto feature", the purchasers of such Securities may be exposed not only to the performance of the Underlying Asset(s) but also to the performance of such foreign currency, currency unit or unit of account, which cannot be predicted. Purchasers should be aware that foreign exchange rates are, and have been, highly volatile and determined by supply and demand for currencies in the international foreign exchange markets, which are subject to economic factors, including inflation rates in the countries concerned, interest rate differences between the respective countries, economic forecasts,

international political factors, currency convertibility and safety of making financial investments in the currency concerned, speculation and measures taken by governments and central banks (e.g., imposition of regulatory controls or taxes, issuance of a new currency to replace an existing currency, alteration of the exchange rate or exchange characteristics by devaluation or revaluation of a currency or imposition of exchange controls with respect to the exchange or transfer of a specified currency that would affect exchange rates as well as the availability of a specified currency). Foreign exchange fluctuations between a purchaser's home currency and the relevant currency in which the repayment amount of the Securities is denominated may affect purchasers who intend to convert gains or losses from the exercise or sale of Securities into their home currency.

If any Underlying Asset(s) are not denominated in the currency of the Securities and at the same time only the performance of the Underlying Asset(s) in their denominated currency is relevant to the payout on the Securities, such Securities are referred to as currency-protected Securities or Securities with a "quanto" feature. Under such feature, the investment return of the Securities depends only on the performance of the Underlying Asset(s) (in the relevant currency) and any change in the rate of exchange between the currency of the Underlying Asset(s) and the Securities is disregarded. Accordingly, the application of a "quanto" feature means that purchasers of such Securities will not have the benefit of any change in the rate of exchange between the currency of the Underlying Asset(s) and the Securities that would otherwise increase the performance of the Underlying Asset(s) in the absence of such "quanto" feature. In addition, changes in the relevant exchange rate may indirectly influence the price of the relevant Underlying Asset(s) which, in turn, could have a negative effect on the return on the Securities.

3.8 **Risks associated with Indices as Underlying Assets**

(i) Factors affecting the performance of Indices

Equity indices are comprised of a synthetic portfolio of shares, and as such, the performance of an Index is dependent upon the macroeconomic factors relating to the shares that underlie such Index, such as interest and price levels on the capital markets, currency developments, political factors as well as company-specific factors such as earnings position, market position, risk situation, shareholder structure and distribution policy.

(ii) Exposure to risk that redemption amounts do not reflect direct investment in underlying shares

The redemption amount payable on Securities that reference Indices may not reflect the return a purchaser would realise if he or she actually owned the relevant shares of any of the companies comprising the components of the Index and received the dividends paid on those shares because the closing index level on any specified valuation or averaging dates may reflect the prices of such index components on such dates without taking into consideration the value of dividends paid on those shares. Accordingly, purchasers of Securities that reference Indices as Underlying Assets may receive a lower payment upon redemption of such Securities than any return such purchaser would have received if he or she had invested in the components of the Index directly.

(iii) Loss of return of dividends in respect of most Securities linked to equity indices

The rules governing the composition and calculation of the relevant underlying Index might stipulate that dividends distributed on its components do not lead to a rise in the index level, for example, if it is a "price" index, which may lead to a decrease in the index level if all other circumstances remain the same. As a result, in such cases the purchasers of Securities in respect of which an Underlying Asset is such type of index will not participate in dividends or other distributions paid on the components comprising the Index. Even if the rules of the relevant

underlying Index provide that distributed dividends or other distributions of the components are reinvested in the Index and therefore result in raising its level, in some circumstances the dividends or other distributions may not be fully reinvested in such Index.

(iv) Change in composition or discontinuance of an index

The sponsor of any Index can add, delete or substitute the components of such Index or make other methodological changes that could change the level of one or more components. The changing of components of any Index may affect the level of such Index as a newly added company may perform significantly worse or better than the company it replaces, which in turn may affect the payments made by the Issuer to the purchasers of the Securities. The sponsor of any such Index may also alter, discontinue or suspend calculation or dissemination of such Index. The sponsor of an Index will have no involvement in the offer and sale of the Securities and will have no obligation to any purchaser of such Securities. The sponsor of an Index may take any actions in respect of such index without regard to the interests of the purchasers of the Securities, and any of these actions could adversely affect the market value of the Securities.

3.9 Risks associated with baskets comprised of various constituents as Underlying Assets

(i) Exposure to performance of basket and its underlying constituents

Where the Securities reference a basket of assets as Underlying Assets, the purchasers of such Securities are exposed to the performance of such basket. The purchasers will bear the risk that such performance cannot be predicted and is determined by macroeconomic factors relating to the constituents that comprise such basket, see risk factor, "3.8 Risks associated with Indices as Underlying Assets".

(ii) Lesser number of basket constituents

The performance of a basket that includes a lesser number of basket constituents will be more affected by changes in the value of any particular basket constituent included therein than a basket that includes a greater number of basket constituents.

(iii) High correlation of basket constituents could have a significant effect on amounts payable

Correlation of the basket constituents indicates the level of interdependence among the individual basket constituents with respect to their performance. Correlation has a value ranging from "-1" to "+1", whereby a correlation of "+1", i.e. a high positive correlation, means that the performance of the basket constituents always moves in the same direction. A correlation of "-1", i.e. a high negative correlation, means that the performance of the basket constituents is always diametrically opposed. A correlation of "0" indicates that it is not possible to make a statement on the relationship between the basket constituents. If, for example, all of the basket constituents originate from the same sector and the same country, a high positive correlation can generally be assumed. Correlation may fall however, for example when the company whose shares are included in the basket are engaged in intense competition for market shares and the same markets. Where the Securities are subject to high correlation, any move in the performance of the basket constituents will exaggerate the performance of the Securities.

(iv) Negative performance of a basket constituent may outweigh a positive performance of one or more basket constituents

Purchasers of Securities must be aware that even in the case of a positive performance of one or more basket constituents, the performance of the basket as a whole may be negative if the

performance of the other basket constituents is negative to a greater extent.

4. **Risks associated with conflicts of interest between Goldman Sachs and purchasers of Securities**

Goldman Sachs will be subject to various conflicts of interest in respect of an issuance of Securities as set out below:

(i) **Taking positions in or dealing with the Underlying Asset(s) (and/or Underlying Components)**

The Issuer (itself or through an affiliate) (the "**Hedging Entity**") may hedge the Issuer's obligations under the Securities by purchasing futures and/or other instruments linked to the Underlying Asset(s) or (if an Index) the stocks or other components underlying the Underlying Asset(s) ("**Underlying Components**"). The Hedging Entity may adjust its hedge by, among other things, purchasing or selling any of the foregoing, and perhaps other instruments linked to the Underlying Asset(s) or (if applicable) the Underlying Components, at any time and from time to time, and may unwind the hedge by selling any of the foregoing on or before the final redemption date or settlement date (as applicable) for the Securities. The relevant Hedging Entity may also enter into, adjust and unwind hedging transactions relating to other Securities whose returns are linked to changes in the level, price, rate or other applicable value of the Underlying Asset(s) or (if applicable) the Underlying Components. Any of these hedging activities may adversely affect the level, price, rate or other applicable value of the Underlying Asset(s) — directly or (if applicable) indirectly by affecting the level, price, rate or other applicable value of Underlying Components — and therefore the market value of the Securities and the amount payable (or deliverable) on redemption of the Securities at maturity. It is possible that the Issuer and/or Hedging Entity or other affiliate could receive substantial returns with respect to such hedging activities while the value of the Securities may decline.

The relevant Hedging Entity (or Hedging Entities) may also engage in trading in one or more of the Underlying Asset(s) or (if applicable) the Underlying Components or instruments whose returns are linked to the Underlying Asset(s) or (if applicable) the Underlying Components, for its proprietary accounts, for other accounts under its management or to facilitate transactions, including block transactions, on behalf of customers. Any of these activities of the Hedging Entity could adversely affect the level, price, rate or other applicable value of the Underlying Asset(s) — directly or (if applicable) indirectly by affecting the level, price, rate or other applicable value of the Underlying Components — and therefore, the market value of the Securities and the amount payable (or deliverable) on redemption of the Securities at maturity. The Issuer, the Hedging Entity or any other affiliate may issue or underwrite, other securities or financial or derivative instruments with returns linked to changes in the level, price, rate or other applicable value of the Underlying Asset(s) or (if applicable) one or more of the Underlying Components, as applicable. By introducing competing products into the marketplace in this manner, the Hedging Entity (and the Issuer indirectly through the Hedging Entity) could adversely affect the market value of the Securities and the amount payable (or deliverable) on redemption of the Securities at maturity.

The Issuer expects that the Hedging Entity (or Hedging Entities) may own securities of, or engage in trading activities related to the Underlying Asset(s) or (if applicable) the Underlying Components that are not for the account or on behalf of purchasers of Securities. These trading activities may present a conflict between the interests of purchasers of Securities and the interests of the Issuer and its affiliates in their proprietary accounts, in facilitating transactions, including block trades, for their customers and in accounts under their management. These trading activities, if they influence the level, price, rate or other applicable value of the Underlying Asset(s), could be adverse to the interests of purchasers of Securities.

(ii) Confidential information relating to the Underlying Asset(s) and the Securities

Certain affiliates of the Issuer and the Guarantor may from time to time, by virtue of their status as underwriter, advisor or otherwise, possess or have access to information relating to the Securities, the Underlying Asset(s) and any derivative instruments referencing them. Such Goldman Sachs affiliates will not be obliged to disclose any such information to a purchaser of the Securities.

(iii) Acting as a hedge counterparty to the Issuer's and Guarantor's obligations under the Securities

Certain affiliates of the Issuer and the Guarantor may be the counterparty to the hedge of the Issuer's and the Guarantor's obligations under an issue of Securities. Accordingly, certain conflicts of interest may arise both among these affiliates and between the interests of these affiliates and the interests of purchasers of Securities. See risk factor, "*4(i) Taking positions in or dealing with the Underlying Asset(s) (and/or Underlying Components)*".

(iv) The Calculation Agent is an affiliate of (or the same entity as) the Issuer

As the Calculation Agent is the same entity as the Issuer, potential conflicts of interest may exist between the Calculation Agent and the purchasers, including with respect to the exercise of the very broad discretionary powers of the Calculation Agent. The Calculation Agent has the authority (a) to determine whether certain specified events and/or matters so specified in the conditions relating to a series of Securities have occurred, and (b) to determine any resulting adjustments and calculations as described in such conditions. Prospective purchasers should be aware that any determination made by the Calculation Agent may have an impact on the value and financial return of the Securities. Any such discretion exercised by, or any calculation made by, the Calculation Agent (in the absence of manifest or proven error) shall be binding on the Issuer and all purchasers of the Securities.
