B.17	Assigned credit ratings	<p>The credit ratings assigned to the Issuer are (i) Aa3 (long term senior debt); with a negative outlook and A3 (subordinated debt), P-1 (short-term debt) and Baa2 (hyp) (preferred share) each with a stable outlook, by Moody's Investors Services, Inc. ("Moody's USA"); (ii) AA- (long term senior debt), A (subordinated debt), A-1+ (short-term debt) and A-- (preferred shares)¹, each with a stable outlook, by Standard & Poor's Financial Services LLC ("S&P USA"); (iii) AA (long term senior debt), AA- (subordinated debt) and F1+ (short-term debt), each with a stable outlook, by Fitch Inc.; and (iv) AA (long term senior debt), AA (low) (subordinated debt), R-1 (high) (short-term debt) and Pfd-1 (low) (preferred shares)¹, each with a stable outlook, by DBRS Limited- ("DBRS").</p>
		<p>On October 23, 2013, Kroll Bond Rating Agency ("KBRA"), a registered National Recognized Statistical Rating Organization with the SEC, assigned the Issuer's senior long-term and short-term debt and deposit ratings of AA and K1+, respectively, with a stable outlook. KBRA was requested to rate a commercial MBS multi-borrower transaction where the Issuer was one of four third party interest rate cap providers. Given KBRA's policy to rate all parties to a transaction, it was required to issue a rating on the Issuer. These ratings were unsolicited and the Issuer did not participate in the rating process.</p>

Section D - Risks

Element	Title	
D.2	Key information on the key risks that are specific to the Issuer	<p>The following is a summary of the key risks relating to the Issuer:</p> <p>Regulatory Risk: Certain regulatory reforms have the potential to impact the way in which the Issuer operates, both in Canada and abroad. In particular, the Issuer is subject to (i) Basel Committee on Banking Supervision global standards for capital and liquidity reform (Basel III), which establish minimum requirements for common equity, increased capital requirements for counterparty credit exposures, a new global leverage ration and measures to promote the build up of capital that can be drawn down in periods of stress; (ii) the Dodd-Frank – Enhanced Supervision of Foreign Banking Organizations pursuant to sections 165 and 166 of the Dodd-Frank Act, which as proposed, would require the Issuer to re-organize all of the Issuer’s U.S. bank and non-bank subsidiaries into a separately capitalized U.S. holding company, against which U.S. prudential regulations for capital, liquidity and enhanced supervision would apply; (iii) the Volcker Rule under the Dodd-Frank Act, which impacts the Issuer’s global capital markets activities and funding activities; (iv) over-the-counter reforms, which will affect the Issuer’s wholesale banking business; (v) changes to the payments systems in Canada, which could have implications for the Issuer from technological systems, operational and regulatory perspectives and could have adverse implications for the Issuer’s revenues and business strategies; (vi) the U.S. Foreign Account Tax Compliance Act (FATCA), which will impact the Issuer’s operations and will increase the Issuer’s reporting, data collection, systems technology, and overall compliance costs; and (vii) regulatory reform in the U.K. and Europe, which could cause the Issuer to incur higher operational and system costs and potential changes in the types of products and services the Issuer can offer clients.</p> <p>High levels of Canadian household debt: Growing Canadian household debt levels and elevated housing prices are resulting in increasing vulnerability to external risk factors. In an increasing interest rate environment the debt service capacity of Canadian consumers will be negatively impacted. The combination of increasing unemployment, rising interest rates and a downturn in real estate markets would pose a risk to the credit quality of the Issuer’s retail lending portfolio and may negatively affect the Issuer.</p> <p>Cybersecurity: Given the Issuer’s reliance on digital technologies to conduct and expand its global operations it is increasingly exposed to the risks related to cybersecurity. Such incidents, may include unauthorised access to its systems for purposes of misappropriating assets, gaining access to sensitive information, corrupting data or causing operational disruption. Such an event could compromise the Issuer’s confidential information as well as that of its clients and third parties with whom it interacts and may result in negative consequences for</p>

Element	Title	
		<p>the Issuer including remediation costs, loss of revenue, additional regulatory scrutiny, litigation and reputational damage, all of which could adversely impact its ability to make payments and/or deliveries in respect of the Securities.</p> <p>Credit Risk: Credit risk is the risk of loss associated with an obligor’s potential inability or unwillingness to fulfil; their contractual obligations. Credit risk may arise directly from the risk of default of a primary obligor of the Issuer (e.g. issuer, debtor, counterparty, borrower or policyholder), or indirectly from a secondary obligor (e.g. guarantor or reinsurer). The failure to effectively manage credit risk across all the Issuer’s products, services and activities can have a direct, immediate and material impact on the Issuer’s earnings and reputation.</p> <p>Market Risk: Market risk is defined to be the potential loss due to changes in market determined variables such as interest rates, credit spreads, equity prices, commodity prices, foreign exchange rates and implied volatilities. Most of the market risks that have a direct impact on the Issuer’s earnings results from the Issuer’s trading activities, where it acts primarily as a market maker.</p> <p>Liquidity and Funding Risk: Liquidity and funding risk (liquidity risk) is the risk that the Issuer may be unable to generate or obtain sufficient cash or its equivalent in a timely and cost-effective manner to meet its commitments as they come due (including the Securities). The nature of banking services inherently exposes the Issuer to various types of liquidity risk. The most common sources of liquidity risk arise from mismatches in the timing and value of cash inflows and outflows, both from on and off-balance sheet exposures. As the Issuer’s core funding comprises capital, longer–term wholesale liabilities and a diversified pool of personal and, to a lesser extent, commercial and institutional deposits, a lowering of the Issuer’s credit ratings may have potentially adverse consequences for the Issuer’s funding capacity or access to capital markets, may affect its ability, and the cost, to enter into normal course derivatives or hedging transactions and may require it to post additional collateral under certain contracts, any of which may have an adverse effect on its results of operations and financial condition.</p>
D.3	Key information on the key risks that are specific to the Securities	<p>Securities may involve a high degree of risk. There are certain factors which are material for the purpose of assessing the market risks associated with investing in any issue of Securities.</p> <p>The Issuer may issue Securities with principal, premium, interest, amounts deliverable or other amounts determined by reference to Reference Items.</p>

In addition to structural risks relating to such Securities (including Index Linked Securities, Equity Linked Securities, Currency Linked Securities, Fund Linked Securities, Preference Share Linked Notes and Commodity Linked Securities), other risks include market disruption in respect of relevant Reference Items, settlement disruption, expenses required for Physical Delivery, hedging and other potential conflicts of interest, tax treatment, binding modifications by specified majorities at meetings or (other than for Swedish Notes) in written resolutions or electronic consents, Canadian usury laws, early redemptions, possible illiquidity of the Securities, exchange rate risks, credit ratings, no obligation to maintain listing, time lag between exercise of W&C Securities and determination of amounts payable, absence of a pre-determined expiration date for Open-Ended W&C Securities, the market value of the Securities will be affected by the creditworthiness of the Issuer and holders of W&C Securities must pay all expenses, including taxes, relating to the W&C Securities (subject to the Issuer's gross up obligation in respect of Certificates that evidence deposit liabilities), the Issuer has no obligation to gross up in respect of withholding tax applicable to Warrants or Certificates that are not deposits and Securities may be subject to write-off, write-down or conversion under current and proposed Canadian resolution powers.</p> <p>Securities denominated in Renminbi are subject to additional risks; Renminbi is not freely convertible or transferable and there are significant restrictions on remittance of Renminbi into and outside the People's Republic of China (excluding Hong Kong, Macao Special Administrative Region of the People's Republic of China and Taiwan) (the "PRC") which may adversely affect the liquidity of Securities denominated in Renminbi; there is only limited availability of Renminbi outside the PRC, which may affect the liquidity of such Securities and the Issuer's ability to source Renminbi outside the PRC to service such Securities; if the Issuer is unable to source Renminbi, it may pay holders of such Securities in U.S. dollars; payments in respect of Securities denominated in Renminbi will only be made to investors in the manner specified under the relevant terms and conditions.</p>

Investors should therefore only invest in leveraged Securities if they fully understand the effects of leverage; • in the event of the insolvency of the Issuer or if it is otherwise unable or unwilling to make payments and/or deliveries in respect of the Securities when due, an investor may lose all or part of his investment in the Securities.
