Selling Restrictions

Save as expressly permitted herein, no public offering of the Securities, or possession or distribution of any offering material in relation thereto, is permitted in any jurisdiction. This term sheet may not be used for the purpose of any offer or solicitation by anyone in any jurisdiction in which that offer or solicitation is not authorized or to any person to whom it is unlawful to make such an offer or solicitation.

In each member state of the European Economic Area which has implemented the Prospectus Directive (Directive 2003/71/EC), no offer of the Notes to the public (as defined for the purposes of such Directive and any implementing measures in any such member state) may be made, except in circumstances which do not result in any breach of such Directive and any such implementing measures by the offeror or the Issuer, the Dealer and their respective affiliates and for this purpose an offer shall not be treated as not requiring the public of a prospectus pursuant to Article 3 of the Prospectus Directive, or any corresponding provision of any such implementing measures solely by virtue of the application of Article 3(2)(b) (offer to fewer than 150 persons) or any corresponding provision of any such implementing measures.

The Securities have not been and will not be registered under the U.S. Securities Act of 1933, as amended, or the securities laws of any State in the United States, and are subject to U.S. tax requirements. The Securities may not be offered, sold or delivered at any time, directly or indirectly, within the United States (which term includes the territories, the possessions and all other areas subject to the jurisdiction of the United States of America) or to or for the account of a U.S. Person (as defined in Regulation S under the Securities Act of 1933, as amended). Risk Factors

Potential investors are urged to consult with their legal, regulatory, investment, accounting, tax and other advisors with regard to any proposed or actual investment in the Notes and to review the Prospectus.

Please see the Prospectus for a full detailed description of the Notes and in particular, please review the Risk Factors associated with these Notes. Investing in the Notes entails certain risks including, but not limited to, the following:

Adjustments by the Determination Agent: The terms and conditions of the Notes will allow the Determination Agent to make adjustments or take any other appropriate action if circumstances occur where the Notes or any exchanges are affected by market disruption, adjustment events or circumstances affecting normal activities.

In addition, other circumstances may occur which either increase the liability of the Issuer fulfilling its obligations under the Securities or increase the liability of any hedging activities related to such obligations, including without limitation the adoption of or any change in any tax law relating to a common system of financial transaction tax in the European Union or otherwise.

In such circumstances, the Determination Agent can in its sole and absolute discretion determine whether to redeem the Securities early, or adjust the terms of the Securities, which may include without limitation adjustments to the Initial Reference Price, the Final Redemption Amount or the Underlying. The Determination Agent is not required but has the discretion to make adjustments with respect to each and every corporate action.

Potential investors should see the Prospectus for a detailed description of potential adjustment events and adjustments.

Adjustment and Discontinuation Risk: The Sponsor or issuer of the Underlying can add, delete or substitute stocks or other underlying constituents constituting the Underlying or make other methodological changes that could change the value of the Underlying without regard to the interests of holders of the Notes. Any of these decisions/determinations may adversely affect the value of the Notes and may result in the investor receiving a return that is materially different from what he/she would have received if the event had not occurred.

Credit Risk: Investors are exposed to the credit risk of the Issuer and/or Guarantor. The Securities are essentially a loan to the Issuer with a repayment amount linked to the performance of the Underlying that the Issuer promises to pay to you at maturity and that the Guarantor promises to pay to you if the Issuer fails to do so. There is the risk, however, that the Issuer and the Guarantor may not be able to fulfill their obligations, irrespective of whether the Securities are referred to as capital or principal protected. Investors may lose all or part of their investment if the Issuer and/or Guarantor is unable to pay the coupons (if any) or the redemption amount. No assets of the Issuer and/or Guarantor are segregated and specifically set aside in order to pay the holders of the Securities in the event of liquidation of the Issuer and/or Guarantor, and the holders of the Securities will rank behind secured or preferred creditors.

Capital is not protected: the final redemption amount depends on the performance of the Underlying and could be zero.

Exit Risk: The secondary market price of the Securities will depend on many factors, including the value and volatility of the Underlying, interest rates, time remaining to maturity and the creditworthiness of the Issuer and the Guarantor. The secondary market price may be lower than the market value of the issued Securities as at the Issue Date to take into account amounts paid to distributors and other intermediaries relating to the issue and sale of the Securities as well as amounts relating to the hedging of the Issuer's obligations. As a result of all of these factors, the holder may receive an amount in the secondary market which may be less than the then intrinsic market value

This information has been prepared solely for information purposes and is not an offer (or solicitation of an offer) to buy or sell the product. The product may not be offered, sold, transferred or delivered directly or indirectly in the United States to, or for the account or benefit of, any U.S. Person (as defined in Regulation S under the Securities Act). of the Security and which may also be less than the amount the holder would have received had the holder held the Security through to maturity.

Liquidity Risk: Any secondary market in the Securities made by the Dealer will be made on a reasonable efforts basis only and subject to market conditions, law, regulation and internal policy. Even whilst there may be a secondary market in the Securities it may not be liquid enough to facilitate a sale by the holder

Hedging Risk: On or prior to and after the Trade Date, the Issuer, through its affiliates or others, will likely hedge its anticipated exposure under the Securities by taking positions in the Underlying, in option contracts on the Underlying or positions in any other available securities or instruments. In addition, the Issuer and its affiliates trade the Underlying as part of their general businesses. Any of these activities could potentially affect the value of the Underlying, and accordingly, could affect the payout to holders on the Securities.

No Shareholder Rights: A holder of Notes will have no beneficial interest in the stocks that compose the relevant Underlying nor any voting rights and will not have the right to receive dividends or other distributions with respect to the stocks that compose the Underlying.

Potential Conflict of Interest: The Determination Agent, which is also the Issuer, will determine the pay-out to the investor at maturity. Morgan Stanley & Co. International plc and its affiliates may trade the Underlying on a regular basis as part of its general broker-dealer business and may also carry out hedging activities in relation to the Notes. Any of these activities could influence the Determination Agent's determination of adjustments made to any Notes and any such trading activity could potentially affect the price of the Underlying and, accordingly, could affect the investor's pay-out on any Note.

Underlying Sponsor Risk: The Sponsor or issuer of the relevant Underlying is not an affiliate of the Issuer or its affiliates and is not involved with this offering in any way. Consequently, the Issuer and the Determination Agent have no ability to control the actions of the Sponsor of the relevant Underlying, including and rebalancing that could trigger an adjustment to the terms of the Notes by the Determination Agent.
