SECTION D – RISKS

D.2

Key risks that are specific to the Issuer

The payment of any amount due on the Securities is subject to our credit risk. The Securities are our unsecured obligations. The Securities are not bank deposits and are not insured or guaranteed by the UK Financial Services Compensation Scheme or any other government or governmental or private agency, or deposit protection scheme in any jurisdiction. The value of and return on your securities will be subject to our credit risk and to changes in the market's view of our creditworthiness.

References in Element B.12 above to the "prospects" and "financial or trading position" of the Issuer, are specifically to the Issuer's ability to meet its full payment obligations under the Securities in a timely manner. Material information about the Issuer's financial condition and prospects is included in GSI's annual and semi-annual reports. You should be aware, however, that each of the key risks highlighted below could have a material adverse effect on the Issuer's businesses, operations, financial and trading position and prospects, which, in turn, could have a material adverse effect on the return investors receive on the Securities.

The Issuer is subject to a number of key risks:

- GSI's businesses have been and may continue to be adversely affected by conditions in the global financial markets and economic conditions generally.
- GSI's businesses have been and may be adversely affected by declining asset values. This is particularly true for those businesses in which it has net "long" positions, receives fees based on the value of assets managed, or receives or posts collateral.
- GSI's businesses have been and may be adversely affected by disruptions in the credit markets, including reduced access to credit and higher costs of obtaining credit.
- GSI's market-making activities have been and may be affected by changes in the levels of market volatility.
- GSI's investment banking, client execution and investment management businesses have been adversely affected and may continue to be adversely affected by market uncertainty or lack of confidence among investors and CEOs due to general declines in economic activity and other unfavourable economic, geopolitical or market conditions.
- GSI's investment management business may be affected by the poor

		<p>investment performance of its investment products.</p> <ul style="list-style-type: none"> • GSI may incur losses as a result of ineffective risk management processes and strategies. • GSI's liquidity, profitability and businesses may be adversely affected by an inability to access the debt capital markets or to sell assets or by a reduction in its credit ratings or by an increase in its credit spreads. • Conflicts of interest are increasing and a failure to appropriately identify and address conflicts of interest could adversely affect GSI's businesses. • GSI's businesses, profitability and liquidity may be adversely affected by deterioration in the credit quality of, or defaults by, third parties who owe GSI money, securities or other assets or whose securities or obligations it holds. • Concentration of risk increases the potential for significant losses in GSI's market-making, underwriting, investing and lending activities. • The financial services industry is both highly competitive and interrelated. • GSI faces enhanced risks as new business initiatives leads it to transact with a broader array of clients and counterparties and exposes it to new asset classes and new markets. • Derivative transactions and delayed settlements may expose GSI to unexpected risk and potential losses. • GSI's businesses may be adversely affected if it is unable to hire and retain qualified employees. • GSI's businesses and those of its clients are subject to extensive and pervasive regulation around the world. • GSI may be adversely affected by increased governmental and regulatory scrutiny or negative publicity. • A failure in GSI's operational systems or infrastructure, or those of third parties, could impair GSI's liquidity, disrupt its businesses, result in the disclosure of confidential information, damage its reputation and cause losses. • Substantial legal liability or significant regulatory action against GSI could have material adverse financial effects or cause significant reputational harm, which in turn could seriously harm GSI's business prospects. • The growth of electronic trading and the introduction of new trading technology may adversely affect GSI's business and may increase competition. • GSI's commodities activities, particularly its power generation interests and physical commodities activities, subject GSI to extensive regulation, potential catastrophic events and environmental, reputational and other risks that may expose it to significant liabilities and costs. • In conducting its businesses around the world, GSI is subject to political, economic, legal, operational and other risks that are inherent in operating
--	--	--

		<p>in many countries.</p> <ul style="list-style-type: none"> • GSI may incur losses as a result of unforeseen or catastrophic events, including the emergence of a pandemic, terrorist attacks, extreme weather events or other natural disasters.
D.6	Key risks that are specific to the Securities	<ul style="list-style-type: none"> • Your capital is at risk. Depending on the performance of the underlying asset(s), you may lose some of your investment. • You could also lose some or all of your investment in the Securities where: <ul style="list-style-type: none"> ◦ We (as Issuer) fail or are otherwise unable to meet our payment obligations; ◦ You do not hold your Securities to maturity and the secondary sale price you receive is less than the original purchase price; or ◦ Your Securities are redeemed early due to an unexpected event and the amount you receive is less than the original purchase price. • The estimated value of your Securities (as determined by reference to pricing models used by us) at the time the terms and conditions of your Securities are set on the trade date, will be less than the original issue price of your Securities. • Your Securities may not have an active trading market, and you may be unable to dispose of them. • You will be required to make your investment decision based on the indicative amounts or indicative range rather than the actual amounts, levels, percentages, prices, rates or values (as applicable), which will only be fixed or determined at the end of the offer period after their investment decision is made but will apply to the Securities once issued. • We give no assurance that application for listing and admission to trading will be granted (or, if granted, will be granted by the issue date) or that an active trading market in the Securities will develop. We may discontinue any such listing at any time. • The return on the Securities (whether at maturity or otherwise) will be based on the average of the applicable values of the underlying asset(s). If the value of an underlying asset(s) dramatically surged on a number of averaging dates, the amount payable may be significantly less than it would have been had the amount payable been linked only to the value of that underlying asset(s) on one single date. <p>Risks associated with Securities linked to underlying asset(s):</p> <ul style="list-style-type: none"> • Purchasers of Securities linked to one or more underlying asset(s) are exposed to the performance of such underlying asset(s), which may be subject to unpredictable change over time. • Past performance of an underlying asset is not indicative of future performance. • You will not have any rights of ownership in the underlying asset(s), and our obligations under the Securities to you are not secured by any assets. • Following a disruption event, the valuation of the underlying asset(s) may be postponed and/or valued by us (as Calculation Agent) in our

		<p>discretion.</p> <ul style="list-style-type: none"> Following the occurrence of certain extraordinary events in relation to the underlying asset(s), the terms and conditions of your Securities may be adjusted or the Securities may be redeemed early at the non-scheduled early repayment amount. Such amount may be less than your initial investment and you could lose some or all of your investment. The performance of shares is dependent upon many unpredictable factors. You may receive a lower return on the Securities than you would have received from investing in the shares directly because the price of the shares may not include the value of dividends. The issuer of a share may take any actions in respect of a share without regard to your interests as holders of the Securities, and any of these actions could negatively affect the value of and return on the Securities. <p>Risks associated with Securities linked to a basket of underlying assets:</p> <ul style="list-style-type: none"> A small basket will generally be more vulnerable to changes in the value of the underlying assets and a change in composition of a basket may have an adverse effect on basket performance. A high correlation of basket components may have a significant effect on amounts payable on the Securities and the negative performance of a single basket component may outweigh a positive performance of one or more other basket components and may have an impact on the return on the Securities. Your Securities may be adjusted or redeemed prior to maturity due to a change in law. Any such adjustment may have a negative effect on the value of and return on your Securities; the amount you receive following an early redemption may be less than your initial investment and you could lose some or all of your investment. The Issuer of your Securities may be substituted with another company. We may amend the terms and conditions of your Securities in certain circumstances without your consent.
SECTION E – THE OFFER		
E.2b	Reasons for the offer and use of proceeds	The net proceeds of the offer will be used in the general business of the Issuer.
